

THE HUTCH

8-WEEK • 6-DAY PPL PERFORMANCE BLOCK

3 Heavy / Higher-RPE Sessions + 3 Light / Technique Sessions Each Week

Strength • Power • Athleticism • Technical Skill • Performance

WEEKLY STRUCTURE

Session	Intent	Primary RPE
Push 1	Heavy / strength / performance	~7.5-9
Pull 1	Heavy / strength / performance	~7.5-9
Legs 1	Heavy / strength / performance	~7.5-9
Push 2	Light / form / technique / bar speed	~5.5-7
Pull 2	Light / form / technique / bar speed	~5.5-7
Legs 2	Light / form / technique / bar speed	~5.5-7

The second exposure is deliberately easier: more reps in reserve, no grinders, lower accessory fatigue and a greater emphasis on setup, range of motion, balance, bar path and speed. Rest days can be inserted wherever needed; this is a six-session cycle, not a requirement to train six consecutive days.

WEEK 1

PUSH 1 - HEAVY

#	Exercise	Sets x Reps	Target	Notes
1	Ab Roller	2-3 x 8-15	Controlled	Core/bracing

WEEK 8 PERFORMANCE RULES

Use the heavy Push, Pull and Legs sessions for performance expression. Bench and squat can finish with your technical-max single plus AMRAP protocol. Sumo can finish with a technical-max single and an optional conservative AMRAP. The second Push/Pull/Legs exposures that week remain low-fatigue technique sessions or can be reduced further if recovery from testing requires it.
